-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: identifier 8 is defined in the specification as “the shoulder portion” but not found in the figures. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character “12” has been used to designate both the front of the garment and the back area. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing

figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to because identifier 12 in figure 2 points to the front of the garment and in the specification identifier 12 is supposed to be "the back area". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3765

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Dellinger (US 6,237,151).

Fig. 1

Fig. 4

In regard to claims 1-3, Dellinger provides a warm-up jacket (10) for a pitcher having a portion that surrounds the upper extremity below the wearer's arm (11). A portion of the jacket (10) extending over the front chest quadrant (12), shoulders (18) and at least a portion of a first arm (11). A second arm and associated upper extremity and shoulder region are not covered by the jacket (figure 1). The arm covered (11) by the jacket (10) is the arm used in pitching and a fastener element (40, 41) permitting the region portion of the jacket surrounding the chest to be separated.

In regard to method claims 4-6, Dellinger provides a warm-up jacket (10) for retaining warmth to a pitchers arm and associated muscles (column 1, lines 5-27). The

method of covering the one arm by the jacket, shaping the jacket to expose the second arm and associated abdominal region and providing a lower portion of the jacket to secure the jacket to the user's abdomen (column 3, lines 29-48). The arm that is kept warm by the jacket is the throwing arm of the pitcher and the lower portion of the jacket has a detachable fastener to permit removal and donning of the jacket (column 4, lines 21-47).

In regard to claims 7-9, Dellinger provides a jacket (10) having a portion covering at least one arm (11) and associated regions of the abdomen (22, 28), an aperture (23, 24) in the jacket (10) exposing a second arm and associated regions of the abdomen. A lower portion (28) for securing the jacket to the abdomen including a fastener (40, 41). The jacket (10) permits one arm (11) and associated regions to retain heat (column 1, lines 65-67).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bonoff, Begg, Gasperini, Day, Shuster, Agostini, Marion, Spitz, Veron et al., Herrera, A'Costa, Kerwin, Perry, Bettcher, McGuire et al., Svetich, Rael, Vita, Coffman, Cararen, Ost, May, Davis and Meyer are all cited to show closely related garments.
